

EPIC HCC Support: HCC OPAs (OurPractice Advisories)

The OPA will trigger for any HCC condition(s) that have not been addressed during the current calendar year. Epic does a look back for HCC conditions reported within the past 3 years

- ❖ The color-coded directions help guide the provider to decide on an action regarding the HCC condition. *These are not interactive buttons*
- ❖ HCC conditions needing to be addressed are listed below
- ❖ Each condition has three choices based on whether a condition is on the patient's problem list or not
- ❖ Clicking the "Add to problem list" check box will simultaneously add a condition to the problem list and the visit diagnosis list
- ❖ For conditions that are no longer active or no longer applies to the patient, we recommend choosing the Resolve Problem and/or N/A to Patient buttons

Where is the OPA window in Epic?

Category	Diagnosis	Comments
	Type 2 diabetes mellitus with stage 2 chronic kidney disease, with long-term current use of insulin (*) [MF1.1]	eGFR @ 86 on 5/16/23
Diagnosis	1.1 Flora, Mark	05/17/23 06:42

- ❖ The OPAs can be found via the (!) [Update HCC dx](#) hyperlink in the Storyboard panel
- ❖ Hovering will enable a quick view of the current outstanding HCCs
- ❖ Clicking the hyperlink will bring you into the OPA pop-up window with the full functionality seen on the previous slide
